

Dear FCC..XM radio is the best thing to happen to radio in the last century. Do not restrict its use it is a growing community of loyal listeners and this great country of ours was formed to give all a chance to fairly compete. Do not bow down before the almighty dollar and give xm and other satellite carriers the same freedoms all radio and broadcast outlets have. FM and Am had their day and they cannot deliver like the satellite. The travel service and traffic is invaluable and always on..nothing like it..go with the flow and let them radio dogs compete freely.

Sincerely,

Jack J LeRose XM listener since they came on the scene and dang proud i do subscribe.!!!!
